## Conservation Continuing Education Application Form

The Pine SWCD will assist Pine County landowners with the registration fees associated with conservation trainings and conferences. The purpose of this scholarship is to encourage continuing education for Pine County Landowners that will increase their knowledge and ability to implement sustainable conservation practices on their land. The Pine SWCD Board of Managers allocates \$1,000 per year to be awarded to Pine County Residents whose applications demonstrate that the training will benefit conservation in Pine County. Individual amounts are allocated on a case by case basis.

Scholarships will be awarded based on the event's ability to:

1. Provide landowners with knowledge and resources necessary to accomplish conservation goals independently.
2. Provide landowners with knowledge and skills to establish conservation practices and projects independently.
3. Improve the success of conservation projects by providing landowners with the tools and resources necessary to properly maintain projects for the duration of their lifetime.
